ENSE 271: RMO Checkpoint Meeting 2
New Features
- Have a profile pic for each member / user profile in members list
- When signing up / log-in, username can be email or made-up username. (Ensure there's a constraint for password length and contents) Members can use email for the "Forget my password" feature.
- Regular members must only see the updated / annotated music sheet. Previous versions go to archives so members don't grab the wrong version by mistake
- Notification going to phone or email, specified in settings.
- Multi upload feature to make it easy for somebody adding music to many sections at once.
- Search bars are ideal on music pages.
- Link to calling a number or emailing a person from the contact page.
- Ability to toggle card view or list view in music pages would be nice.
- Ability to comment on music entries, to add videos or other things. This should be doable by all members.
- RMO mainy prefers websites to have a tile outline.
- Notification should have a link to the mentioned subject. (i.e. music sheets, news)

Other Points
- If members respond to events in the calendar, then who can see it? Everyone or just admins? Where does the response go? (For now, just conductor)
- RMO members sometimes want to see another section's music sheets, so they would like a request button. Who does the request go to? Conductor for now. (Can be changed)
- Members might not log-in to account unless they know there's new information. So, RMO wants an option to link phone # (text) or e-mail.
- Avoid email at all costs
- They want to ensure the website works for phone/tablet format.
- Keep the homepage simple
- Limit clicks. Have navigation links accessible from all pages.
