ENSE 271: Hi-Fi Designs Checkpoint Meeting Notes
Additional Features
RMO would like
- An ability to link / subscribe wordpress calendar to google calendar, iCall ect.
- An option to print music sheets
- Spell check (during sign up, document upload, newsletters)
- An option to highlight calendar dates / events
- A payment method on the membership fee page
- Preferably not using a third party photo storage.
- Different levels of admin (admin for whole site, conductor, section leaders, teachers)
- An option to categorize a member under multiple roles
- Ideally, searchable meeting minutes, however it is not a high priority.
- Divide the contact page into roles (not high priority)

Other Notes
- Navigation pane must be collapsible
- Newsletters might not be necessary (Sill being discussed by RMO members)
- They like the links to social media sites
- It is important to show upcoming events on home page
- There is some trust involved. Section leaders could perhaps upload anywhere, but are trusted not to. However, these people should not be able to edit the calendar or other things.
- We should add notification settings to the account page.
- Profile should have a notification or something that reminds the person for a payment due.
- They like the sign-up token / verification code process.
